

Summary: Erickson Consulting Engineers, Inc. (ECE) is responsible for managing all design, permitting and engineering for Jim Neville Preserve Spoil Island Restoration Project (2005 - 2009), Sarasota, FL.

This Project involved the design, engineering and permitting of a 19 acre two spoil island site as mitigation associated with the Midnight Pass Reopening Project. ECE's services included geotechnical and biotic investigations, sediment management planning, water quality data collection and modeling, wetland resource mapping, environmental/biological assessment, design development and acquisition of all state and federal permits.
